

# ISO 204:2009-06 (E)

## Metallic materials - Uniaxial creep testing in tension - Method of test

---

| <b>Contents</b>   |                                | <b>Page</b> |
|---|--------------------------------|-------------|
| Foreword .....  |                                | iv          |
| Introduction .....  |                                | v           |
| 1   | Scope .....                    | 1           |
| 2   | Normative references .....     | 1           |
| 3   | Terms and definitions .....    | 1           |
| 4   | Symbols and designations ..... | 5           |
| 5   | Principle .....                | 7           |
| 6   | Apparatus .....                | 7           |
| 7   | Test pieces .....              | 10          |
| 8   | Test procedure .....           | 13          |
| 9   | Determination of results ..... | 14          |
| 10  | Test validity .....            | 14          |
| 11  | Accuracy of the results .....  | 15          |
| 12  | Test report .....              | 15          |
| Annex A (informative) Information concerning different types of thermocouples .....   |                                | 21          |
| Annex B (informative) Information concerning methods of calibration of thermocouples .....  |                                | 22          |
| Annex C (normative) Creep testing using test pieces with V or blunt circumferential notches .....   |                                | 23          |
| Annex D (informative) Method of estimating the uncertainty of the measurement in accordance<br>with the Guide to the expression of uncertainty in measurement (GUM) ..... |                                | 26          |
| Annex E (informative) Representation of results and graphical extrapolation .....   |                                | 32          |
| Bibliography .....  |                                | 40          |
