## Natural stone test methods - Determination of frost resistance

---

| <b>Contents</b>                         |  | <b>Page</b> |
|---|--|-------------|
| Foreword .....                          |  | 3           |
| 1                                       | Scope .....  | 5           |
| 2                                       | Normative references .....   | 5           |
| 3                                       | Principle .....  | 5           |
| 4                                       | Symbols .....  | 5           |
| 5                                       | Apparatus .....  | 6           |
| 6                                       | Preparation of the specimens .....                                 | 6           |
| 6.1                                     | Sampling .....   | 6           |
| 6.2                                     | Size of specimens .....  | 7           |
| 6.2.1                                   | Technological test (Test A) .....                                  | 7           |
| 6.2.2                                   | Identification test (Test B) .....                                 | 7           |
| 6.2.3                                   | Putting reference marks on the specimens .....                     | 7           |
| 6.3                                     | Monitoring core temperature .....                                  | 7           |
| 6.4                                     | Drying the specimens .....   | 8           |
| 6.5                                     | Immersion of the specimens .....                                   | 8           |
| 6.6                                     | Determination of the apparent volume .....                         | 8           |
| 6.7                                     | Number of cycles .....   | 8           |
| 6.7.1                                   | Technological test (Test A) .....                                  | 8           |
| 6.7.2                                   | Identification test (Test B) .....                                 | 8           |
| 7                                       | Test procedure .....   | 8           |
| 7.1                                     | Arrangement of the specimens in the freezing tank .....            | 8           |
| 7.2                                     | Description of the freezing and thawing cycles .....               | 9           |
| 7.3                                     | Control measurements to determine the freeze/thaw resistance ..... | 9           |
| 7.3.1                                   | Technological test (Test A) .....                                  | 9           |
| 7.3.2                                   | Identification test (Test B) .....                                 | 10          |
| 8                                       | Expression of the results .....                                    | 11          |
| 8.1                                     | Technological test (Test A) .....                                  | 11          |
| 8.2                                     | Identification test (Test B) .....                                 | 11          |
| 9                                       | Test report .....  | 12          |
| Annex A (informative) Test cycles ..... |  | 13          |
| Bibliography .....                      |  | 15          |
