ISO/TR 16268:2009-10 (E)

Surface chemical analysis - Proposed procedure for certifying the retained areic dose in a working reference material produced by ion implantation

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols and abbreviated terms 5

5 Concept and procedure 6
5.1 General information 6
5.2 Preparation of the working and transfer reference materials 8
5.3 Measurement of retained areic dose in the transfer reference material 8
5.4 Compatibility of the working reference material and the surface-analytical method 8

6 Requirements 9
6.1 Reference materials 9
6.2 Instrumentation requirements 9
6.2.1 Ion implanter 9
6.2.2 Wavelength-dispersive X-ray fluorescence spectrometer 9
6.2.3 Electron microprobe 10
6.3 Ion-implantation requirements 10
6.4 Uniformity requirement 10

7 Certification 10
7.1 Working reference material against the transfer reference material 10
7.2 Transfer reference material against the secondary reference material 10
7.3 Retained areic dose of the working reference material 11

Annex A (informative) Ion implantation 12

Annex B (informative) Ion-implantation dosimetry 13

Annex C (informative) X-ray fluorescence spectrometry 14

Annex D (informative) Non-certified secondary reference materials and substitutes 15

Annex E (informative) Uncertainties in measurements of areic dose 16
