DIN 51605:2010-09 (E)

Fuels for vegetable oil compatible combustion engines - Fuel from rapeseed oil - Requirements and test methods

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 6

4 Designation and marking 7

5 Requirements and testing 7
5.1 General requirements 7
5.2 Requirements for added additives 8
5.3 Requirements for testing and compliance with the limit values in cases of dispute 8
5.4 Particularities of the requirements for winter capability 8
5.5 Particularities of the requirement for ignition performance 8
5.6 Additional requirements 9
5.6.1 Verification of the fuel's origin from rapeseed oil 9
5.6.2 Contents of ash-forming or sediment-forming elements 9
5.6.3 Distillation analysis 9
5.6.4 Information on density/temperature conversion 9

6 Product treatment and sampling 11

Annex A (informative) Verification of the oil identity 12

A.1 General information 12
A.2 Methods of testing the fatty acid distribution 12
A.3 Sterol analysis 12

Annex B (informative) Further information on properties and test methods 14

B.1 General 14
B.2 Information on the viscosity for the temperature range from -10 °C to 100 °C 14
B.3 Adaptation of the test method DIN EN 15195:2007-08 for rapeseed oil fuel 14
