

ISO 26802:2010-08 (E)

Nuclear facilities - Criteria for the design and the operation of containment and ventilation systems for nuclear reactors

Contents	Page
Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Functions ensured by the ventilation system	6
4.1 General	6
4.2 Main functions	7
5 Architecture and description of the different ventilation systems	8
5.1 Ventilation of the volumes within the primary containment envelope	8
5.2 Ventilation of the volumes located within the secondary confinement	10
5.3 Ventilation of the volumes located outside the secondary confinement	10
5.4 Miscellaneous ventilation systems not connected with containment envelopes	11
6 Safety aspects for ventilation systems	11
6.1 General principles	11
6.2 Risk assessment procedure -- General	12
6.3 Risk assessment procedure for severe accidents	14
7 Requirements for the design of ventilation systems	15
7.1 Confinement of radioactive material	16
7.2 Filtration	33
7.3 Reactor specificities	35
8 Management of specific risks	38
8.1 Control of combustible gases in the reactor building	38
8.2 Management of ambient conditions	39
8.3 Prevention of risks linked to releases of heat, gases or toxic vapours	41
8.4 Prevention of risks linked to the deposition of matter in ventilation ducts	41
8.5 Prevention of fire hazard	42
8.6 Consideration of external hazards	45
9 Dispositions concerning the management and the operation of the ventilation systems	46
9.1 Organization and operating procedures	46
9.2 Technical operating instructions	46
9.3 Operational management issues	47
9.4 Test procedures and maintenance	47
9.5 Monitoring of the ventilation system	50
9.6 Control of the ventilation system to prevent fire hazards	51
10 Control and instrumentation	53
10.1 Control	53
10.2 Instrumentation	53
10.3 Alarms	54

Annex A (informative) Typical radioactive products in nuclear reactors	55
Annex B (informative) Examples of general confinement concepts for nuclear power reactors	58
Annex C (informative) Examples of safety classification for nuclear power reactors	64
Annex D (informative) Examples of classification of working areas according to radiological contamination hazard	66
Annex E (informative) Example of classification of types of ventilation, according to radiological contamination hazard -- Recommended ventilation configurations	68
Annex F (informative) Existing requirements for aerosol filters	73
Annex G (informative) Examples of loads to consider during the design of NPP ventilation systems	78
Annex H (informative) Typical values of leaktightness for containment and ventilation systems and periodicities of associated controls	79
Annex I (informative) Primary containment envelope status	81
Bibliography	82
