DIN EN 15400:2011-05 (E)

Solid recovered fuels - Determination of calorific value

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Principle 6

5 Reagents 7

6 Apparatus 7

7 Preparation of test sample 10

8 Calorimetric procedure 11

9 Calibration 17

10 Gross calorific value 22

11 Precision 26

12 Calculation of net calorific value at constant pressure 27

13 Test report 28

Annex A (normative) Adiabatic bomb calorimeters 29

Annex B (normative) Isoperibol and static-jacket bomb calorimeters 33

Annex C (normative) Automated bomb calorimeters 38

Annex D (informative) Checklists for the design and procedures of combustion experiments 41

Annex E (informative) Examples to illustrate the main calculations used in this European Standard if an automated (adiabatic) bomb calorimeter is used for determinations 46

Annex F (informative) List of symbols used in this European Standard 49

Annex G (informative) Key-word index 52

Annex H (informative) Flow chart for a routine calorific value determination 55

Annex I (informative) Interlaboratory test results 56

Bibliography 58
