

# DIN EN ISO 376:2011-09 (E)

## Metallic materials - Calibration of force-proving instruments used for the verification of uniaxial testing machines (ISO 376:2011 )

---

<b>Contents</b>		<b>Page</b>
Foreword .....		3
Introduction .....		4
1 <b>Scope</b> .....		5
2 <b>Normative references</b> .....		5
3 <b>Terms and definitions</b> .....		5
4 <b>Symbols and their designations</b> .....		5
5 <b>Principle</b> .....		6
6 <b>Characteristics of force-proving instruments</b> .....		7
7 <b>Calibration of the force-proving instrument</b> .....		7
8 <b>Classification of the force-proving instrument</b> .....		12
9 <b>Use of calibrated force-proving instruments</b> .....		14
<b>Annex A (informative) Example of dimensions of force transducers and corresponding loading fittings</b> .....		15
<b>Annex B (informative) Additional information</b> .....		22
<b>Annex C (informative) Measurement uncertainty of the calibration and subsequent use of the force-proving instrument</b> .....		25
<b>Bibliography</b> .....		34
