ISO 11311:2011-07 (E)

Nuclear criticality safety - Critical values for homogeneous plutonium-uranium oxide fuel mixtures outside of reactors

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Reference systems concerned by this International Standard 1
4.1 Reference fissile media 1
4.2 Moderation conditions 3
4.3 Geometrical models 4
4.4 Reflecting conditions 4

5 Critical values 4
5.1 Presentation of the results 4
5.2 Requirements 4

6 Subcritical limits and margin of safety 5

Annex A (informative) Reference fissile media 6

Annex B (informative) Criticality schemes used for the calculations 7

Annex C (normative) Critical dimensions for a water reflection of 30 cm 9

Annex D (normative) Critical dimensions for a water reflection of 2,5 cm 10

Annex E (normative) Critical parameters for a water reflection of 30 cm 11

Annex F (normative) Critical parameters for a water reflection of 2,5 cm 12
