Foreword v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Personnel qualification 3

5 CR quality indicators 3
5.1 Description of CR quality indicators for user and manufacturer tests 3
5.1.1 General 3
5.1.2 Contrast sensitivity quality indicator 3
5.1.3 Duplex wire quality indicator 3
5.1.4 Converging line pair quality indicator 3
5.1.5 Linearity quality indicators 3
5.1.6 T-target 4
5.1.7 Scanner slipping quality indicator 4
5.1.8 Shading quality indicator 4
5.1.9 Central beam alignment quality indicator (BAM-snail) 4
5.2 Application procedures for CR quality indicators 4
5.2.1 General 4
5.2.2 Exposure of CR quality indicators (user test) 4
5.2.3 Initial assessment of CR quality indicators (user test) 4
5.2.4 Periodical control (user test) 5
5.3 Imaging plate fading 5

6 Procedure for quantitative measurement of image quality parameters 5
6.1 Measurement of the normalized Signal-to-Noise Ratio 5
6.1.1 Step Exposure Method (manufacturer test) 5
6.1.2 Step Wedge Method (manufacturer test and enhanced user test) 8
6.1.3 Contrast sensitivity measurement (manufacturer and user test) 9
6.2 Measurement of minimum read-out intensity of computed radiographs (manufacturer procedure) 9
6.3 Determination of un-sharpness 10
6.3.1 General 10
6.3.2 MTF-method (manufacturer test) 10
6.3.3 Duplex wire method (manufacturer and user test) 11
6.3.4 Converging line pair quality indicators (manufacturer and user test) 12
6.4 Other tests 12
6.4.1 Geometric distortions (manufacturer and user test) 12
6.4.2 Laser beam function (manufacturer and user test) 12
6.4.3 Blooming or flare (manufacturer and user test) 13
6.4.4 Scanner slipping (manufacturer and user test) 13
6.4.5 Shading (manufacturer and user test) 13
6.4.6 Erasure (manufacturer and user test) 13
6.4.7 IP artefacts (user test) 13

7 CR System Classification and Interpretation of Results 14
7.1 General 14

7.2 Range of CR System Classification 14
7.3 Determination of ISO Speed (manufacturer procedure) 15

Annex A (informative) Example for IIPx measurement 16

Annex B (informative) Example of CR test phantom 20

B.1 Location and alignment of CR Quality Indicators in a CR Phantom 20
B.2 Shading test 21
B.2.1 General 21
B.2.2 Shading Quality Indicator 21
B.2.3 Procedure 21
B.3 Central beam alignment 21
B.3.1 CR Alignment Quality Indicator (BAM-snail) 21
B.3.2 Procedure 22
B.4 Contrast sensitivity quality indicator 22

Annex C (informative) Guidance for application of various tests and test methods 23

C.1 Manufacturer tests 23
C.2 Tests after repair, upgrade or the use of an improved IP 23
C.3 User tests for long-term stability 23
