ISO 16826:2012-04 (E)

Non-destructive testing - Ultrasonic testing - Examination for discontinuities perpendicular to the surface

Contents

Page

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Tandem examination 1
4.1 General 1
4.2 Time base adjustment 2
4.3 Setting of sensitivity 3
4.4 Determination of examination zones 3
4.5 DGS-diagram for tandem examination 4
4.6 Corrections of sensitivity 5
4.7 Object with concentric surfaces 5

5 LLT-examination 7
5.1 General 7
5.2 Time base adjustment and determination of discontinuity depth 8
5.3 Setting of sensitivity 9
5.4 Determination of examination depth 9
5.5 DGS-diagrams for LLT-examination 11
5.6 Correction of sensitivity 11

Annex A (informative) Nomograms for determination of tandem distances for convex (Figure A.1) and concave (Figure A.2) scanning surface 12

Foreword iv
