Foreword 3

1 Scope 4

2 Normative references 4

3 Test specimens 5

4 Conditioning 5

5 Atmosphere during test 5

6 Measurement of dimensions 5

7 Mandatory tests 6
7.1 Apparent density 6
7.2 Compressive stress 6
7.3 Compression set 6
7.4 Tensile strength and elongation 6
7.5 Dimensional stability at elevated temperature 6
7.6 Water absorption 7
7.7 Burning characteristics 8

8 Optional tests 8
8.1 Dynamic cushioning performance 8
8.2 Compressive creep 8
8.3 Thermal conductivity 9
8.4 Water-vapour transmission 9
8.5 Dynamic stiffness 9
8.6 Cell count 9
8.7 Tear strength 9
8.8 Permanent set after repeated compression 10

9 Test report 11

Annex A (normative) Cell count procedure 13
