

# DIN EN ISO 14577-1:2015-11 (E)

## Metallic materials - Instrumented indentation test for hardness and materials parameters - Part 1: Test method (ISO 14577-1:2015)

---

<b>Contents</b>		<b>Page</b>
European foreword .....		3
Introduction .....		4
1 Scope .....		5
2 Normative references .....		5
3 Symbols and designations .....		6
4 Principle .....		8
5 Testing machine .....		8
6 Test piece .....		9
7 Procedure .....		9
8 Uncertainty of the results .....		12
9 Test report .....		13
Annex A (normative) Materials parameters determined from the force/indentation depth data set .....		15
Annex B (informative) Types of control use for the indentation process .....		28
Annex C (normative) Machine compliance and indenter area function .....		29
Annex D (informative) Notes on diamond indenters .....		31
Annex E (normative) Influence of the test piece surface roughness on the accuracy of the results .....		32
Annex F (informative) Correlation of indentation hardness $H_{IT}$ to Vickers hardness .....		33
Annex G (normative) Drift and creep rate determination .....		35
Annex H (informative) Estimation of uncertainty of the calculated values of hardness and materials parameters .....		37
Annex I (normative) Calculation of radial displacement correction .....		47
Bibliography .....		49
