

DIN EN ISO 14577-1:2015-11 (E)

Metallic materials - Instrumented indentation test for hardness and materials parameters - Part 1: Test method (ISO 14577-1:2015)

Contents	Page
European foreword.....	3
Introduction.....	4
1 Scope.....	5
2 Normative references.....	5
3 Symbols and designations.....	6
4 Principle.....	8
5 Testing machine.....	8
6 Test piece.....	9
7 Procedure.....	9
8 Uncertainty of the results.....	12
9 Test report.....	13
Annex A (normative) Materials parameters determined from the force/indentation depth data set.....	15
Annex B (informative) Types of control use for the indentation process.....	28
Annex C (normative) Machine compliance and indenter area function.....	29
Annex D (informative) Notes on diamond indenters.....	31
Annex E (normative) Influence of the test piece surface roughness on the accuracy of the results.....	32
Annex F (informative) Correlation of indentation hardness H_{IT} to Vickers hardness.....	33
Annex G (normative) Drift and creep rate determination.....	35
Annex H (informative) Estimation of uncertainty of the calculated values of hardness and materials parameters.....	37
Annex I (normative) Calculation of radial displacement correction.....	47
Bibliography.....	49
