## Method for evaluation of tensile properties of metallic superplastic materials

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Symbols, terms and definitions .....	1
4	Principle .....	3
5	Test piece .....	4
6	Apparatus .....	5
6.1	Testing machine .....	5
6.2	Clamping device for test pieces .....	5
6.3	Heating apparatus .....	5
6.4	Atmosphere .....	5
6.5	Thermometric apparatus .....	5
7	Procedure .....	6
7.1	General .....	6
7.2	Method for clamping the test piece .....	6
7.3	Measurement of the test temperature .....	6
7.4	Application of the force .....	6
7.5	Method for dimensional measurement of test pieces .....	6
7.6	Method for determining the superplastic elongation .....	6
7.7	Determination of strain rate sensitivity exponent (m-value) .....	7
7.8	Determination of the m-value with the R-type test piece .....	8
8	Test report .....	10
