DIN 25463-1:2014-02 (E)

Calculation of the decay power in nuclear fuels of light water reactors - Part 1: Uranium oxide nuclear fuel for pressurized water re actors

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Terms and definitions, symbols 5

3 Decay power 8
3.1 General 8
3.2 Power histogram 8
3.3 Calculation instructions 9
3.3.1 General 9
3.3.2 Decay power of the fission products and their decay products, SP 11
3.3.3 Decay power of the actinides and of nuclides resulting from neutron capture reaction in the fission products, PR 11
3.3.4 Total decay power, PZ 12
3.4 Uncertainty of the results, ZP 12

Annex A (normative) Linear interpolation of the effective cross-sections 27

A.1 General 27
A.2 Linear interpolation of the effective cross-sections for the fuel properties 28
A.3 Linear interpolation of the effective cross-sections for the respective burn-up rate 29

Annex B (informative) Application examples 31

B.1 PWR fuel element and power histogram specifications 31
B.2 Calculation results 33
