DIN EN 12496:2014-02 (E)

Galvanic anodes for cathodic protection in seawater and saline mud

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Galvanic anode materials and their properties 8
4.1 General 8
4.2 Anode alloy composition 8
4.3 Electrochemical properties 9
4.3.1 General 9
4.3.2 Potential 9
4.3.3 Current capacity 9
4.3.4 Anode consumption rate 10

5 Anode design and acceptance criteria 10
5.1 General 10
5.2 Chemical composition 11
5.3 Physical properties 11
5.4 Electrochemical testing 11
5.5 Anode core materials 12
5.6 Cable connections 13

Annex A (normative) Physical tolerances for galvanic anodes 14

A.1 Anode mass 14
A.2 Anode dimensions and straightness 14
A.3 Steel core 15
A.4 Anode surface irregularities 15
A.5 Cracks in cast anodic material 15
A.5.1 General 15
A.5.2 Stand-off and flush mounting anodes 16
A.5.3 Bracelet anodes 16
A.6 Internal defects and destructive testing 16

Annex B (informative) Composition and performance properties for galvanic anodes 18

B.1 Aluminium alloys 18
B.1.1 Anode material 18
B.1.2 Electrochemical properties 19
B.2 Magnesium alloy 20
B.2.1 Anode material 20
B.2.2 Electrochemical properties 21
B.3 Zinc alloy 22
B.3.1 Anode material 22
B.3.2 Electrochemical properties 23

Annex C (informative) Description of various electrochemical tests 24

C.1 Free running test 24
C.2 Galvanostatic test 24
C.3 Potentiostatic test 24
C.4 Quality control testing 25
