Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Qualification and certification of personnel 6

4 Information required prior to examination 6

5 Principles of ultrasonic examination 7
5.1 General 7
5.2 Vibration mode and direction of sound propagation 7
5.3 Transmission technique 7
5.4 Pulse echo technique 7

6 Equipment 8
6.1 Ultrasonic instrument 8
6.2 Ultrasonic probes 8
6.2.1 Probe selection 8
6.2.2 Frequency and dimensions of transducer 8
6.2.3 Dead zone 8
6.2.4 Damping 9
6.2.5 Focusing probes 9
6.3 Coupling media 9
6.4 Calibration blocks 9
6.5 Reference blocks 9
6.6 Specific blocks 10

7 Settings 10
7.1 General settings 10
7.2 Range settings 10
7.3 Amplification 11
7.4 Pulse repetition frequency 11

8 Preparation for examination 11
8.1 Surface preparation 11
8.2 Identification and datum points 11
8.3 Application of transfer correction 11

9 Examination 12
9.1 Examination coverage 12
9.2 Overlap and scanning speed 12
9.2.1 Overlap 12
9.2.2 Scanning speed 12
9.3 Evaluation and recording levels 12
9.3.1 Pulse echo technique 12
9.3.2 Transmission technique 12

10 Characterization of imperfections 12

10.1 Pulse echo technique 12
10.2 Transmission techniques 13

11 Examination procedure 13

12 Examination report 14
