Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Principle 1

5 Reagents 1

6 Apparatus and materials 2

7 Test method 3
7.1 Sampling of test specimen 3
7.2 Preparation of container 4
7.3 Preparation of odour chemical solution or master gas 4
7.4 Testing procedure 4
7.4.1 Take three specimens from the sample for one test as shown in Table 1 4
7.5 Measurement of odour gas concentration 6
7.5.1 General 6
7.6 Testing without specimen 6

8 Calibration 6

9 Test result 6
9.1 Calculation of the concentration of the odour chemical 6
9.2 Calculation of reduction rate for odour chemical 7

10 Test report 7

Annex A (informative) Actual application of the thermal desorption GC-MS to the measurement of indole, isovaleric acid, and nonenal 8

Annex B (informative) Actual application of ion chromatography to the measurement of hydrogensulfide 15

Annex C (informative) Actual application of ion chromatography to the measurement of methyl mercaptan 19

Annex D (informative) Practical example 22
