

ISO 17299-4:2015-01 (E)

Textiles - Determination of deodorant property - Part 4: Condensation sampling analysis

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	1
5 Reagents	1
6 Apparatus and materials	2
7 Test method	3
7.1 Sampling of test specimen	3
7.2 Preparation of container	4
7.3 Preparation of odour chemical solution or master gas	4
7.4 Testing procedure	4
7.4.1 Take three specimens from the sample for one test as shown in Table 1	4
7.5 Measurement of odour gas concentration	6
7.5.1 General	6
7.6 Testing without specimen	6
8 Calibration	6
9 Test result	6
9.1 Calculation of the concentration of the odour chemical	6
9.2 Calculation of reduction rate for odour chemical	7
10 Test report	7
Annex A (informative) Actual application of the thermal desorption GC-MS to the measurement of indole, isovaleric acid, and nonenal	8
Annex B (informative) Actual application of ion chromatography to the measurement of hydrogen sulfide	15
Annex C (informative) Actual application of ion chromatography to the measurement of methyl mercaptan	19
Annex D (informative) Practical example	22
