DIN EN 16711-1:2016-02 (E)

Textiles - Determination of metal content - Part 1: Determination of metals using microwave digestion

Contents

Page

European foreword 3

1 Scope 4

2 Normative references 4

3 Principle 4

4 Apparatus 4

5 Reagents 5

6 Test specimen sampling 5
6.1 Natural and man-made textiles 5
6.2 Garment components with painted and other similar surface coatings 5
6.3 Metallic products 5
6.4 Non-metal products 6
6.4.1 General 6
6.4.2 Ceramics, glass and crystal and other siliceous materials 6
6.4.3 Plastics, polymers (includes prints and coatings other than 6.2) and other non- siliceous materials 6

7 Procedure 6
7.1 Digestion of natural and man-made textiles, and coated fabrics 6
7.2 Digestion of paint and other similar surface coatings 6
7.3 Digestion of metallic products 7
7.4 Digestion of non-metal products 7
7.4.1 Ceramics, glass and crystal and other siliceous materials 7
7.4.2 Plastics, polymers and other non-siliceous materials 8
7.5 Determination of metals 8
7.6 Reporting of results 8

8 Reliability of the method 9

9 Test report 9

Annex A (informative) Laboratory microwave procedure 10

A.1 Cleaning of polytetrafluoroethylene glassware and vessels 10
A.2 Sample preparation (digestion) 10

Annex B (informative) Procedure characteristics 12

B.1 Trueness complying with ISO 5725-4 12
B.2 System precision 13
B.3 Limit of detection and limit of quantification 13
