

DIN EN 16711-1:2016-02 (E)

Textiles - Determination of metal content - Part 1: Determination of metals using microwave digestion

Contents		Page
European foreword		3
1	Scope	4
2	Normative references	4
3	Principle	4
4	Apparatus	4
5	Reagents	5
6	Test specimen sampling	5
6.1	Natural and man-made textiles	5
6.2	Garment components with painted and other similar surface coatings	5
6.3	Metallic products	5
6.4	Non-metal products	6
6.4.1	General	6
6.4.2	Ceramics, glass and crystal and other siliceous materials	6
6.4.3	Plastics, polymers (includes prints and coatings other than 6.2) and other non- siliceous materials	6
7	Procedure	6
7.1	Digestion of natural and man-made textiles, and coated fabrics	6
7.2	Digestion of paint and other similar surface coatings	6
7.3	Digestion of metallic products	7
7.4	Digestion of non-metal products	7
7.4.1	Ceramics, glass and crystal and other siliceous materials	7
7.4.2	Plastics, polymers and other non-siliceous materials	8
7.5	Determination of metals	8
7.6	Reporting of results	8
8	Reliability of the method	9
9	Test report	9
Annex A (informative) Laboratory microwave procedure		10
A.1	Cleaning of polytetrafluoroethylene glassware and vessels	10
A.2	Sample preparation (digestion)	10
Annex B (informative) Procedure characteristics		12
B.1	Trueness complying with ISO 5725-4	12
B.2	System precision	13
B.3	Limit of detection and limit of quantification	13
