Foreword iv

Introduction v

1 Scope 1

2 Terms,definitions,andabbreviatedterms 1
2.1 Terms and definitions 1
2.2 Abbreviated terms 1

3 Principle 2
3.1 General 2
3.2 UV-Vis absorption spectroscopy 2
3.3 Absorption peaks of quantum dots in the UV-Vis region 2
3.4 Relation between quantum dot diameter and optical absorption peak wavelength 3
3.5 Relation between quantum dot concentration and optical absorption peak intensities 4
3.5.1 Normalization of absorbance A for samples with wide size distributions 4
3.5.2 Derivation of extinction coefficient from particle size 4

4 Sample preparation 5

5 Measurement procedure 5
5.1 UV-Vis spectrometer 5
5.2 Optical measurement procedure 5
5.3 Recommended conditions 5

6 Data analysis and interpretation of results 5
6.1 Data analysis for approximation of QD size 6
6.2 Data analysis for characterization of QD concentration 6

7 Measurement uncertainty 6

8 Test report 6

Annex A (informative) Case study for determining the diameters of CdSe QDs from UV-Vis absorption spectra 8

Annex B (informative) Case study for determining the number concentrations of CdSe QDs in a dispersion 15
