

DIN 51623:2015-12 (E)

Fuels for vegetable oil compatible combustion engines - Fuel from vegetable oil - Requirements and test methods

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	6
4	Product designation and marking	7
5	Requirements and testing	7
5.1	General requirements	7
5.2	Requirements for added additives	9
5.3	Requirements for testing and compliance with the limit values in cases of dispute	9
5.4	Particularities of the requirements for winter capability	9
5.5	Particularities of the requirement for the wax content	9
5.6	Particularities of the requirement for ignition quality	9
5.7	Additional requirements	10
5.7.1	Content of ash-forming or sediment-forming elements	10
5.7.2	Distillation analysis	10
5.7.3	Information on density/temperature conversion	10
6	Product treatment and sampling	11
Annex A (normative) Visual examination of the liquid fuel after cooling		12
Annex B (normative) Adaptation of the test method according to DIN EN 15195:2007-08 for the purposes of vegetable oil fuel		13
Annex C (informative) Verification of the oil identity		14
Annex D (informative) Calculation of fuel properties using structural parameters		16
Annex E (informative) Further information on properties and test methods		18
Annex F (informative) Index to describe the viscosity-temperature behaviour of vegetable oil fuel ..		19
Bibliography		24
