## Surface chemical analysis - Scanning-probe microscopy - Determination of cantilever normal spring constants

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Symbols and abbreviated terms .....	2
5	General information .....	4
5.1	Background information .....	4
5.2	Methods for the determination of AFM normal spring constant .....	5
6	Dimensional methods to determine $k_z$ .....	5
6.1	General .....	5
6.2	$k_z$ using formulae requiring 3D geometric information .....	5
6.2.1	Method .....	5
6.2.2	Measuring the required dimensions and material properties of the cantilever .....	7
6.2.3	Determining $k_z$ for the rectangular cantilever .....	8
6.2.4	Determining $k_z$ for the V-shaped cantilever .....	8
6.2.5	$k_z$ for the trapezoidal cross-sections .....	9
6.2.6	$k_z$ to account for coatings .....	9
6.3	$k_z$ using plan view dimensions and resonant frequency for rectangular tipless cantilevers .....	10
6.3.1	Determining $k_z$ .....	10
6.3.2	Uncertainty .....	11
7	Static experimental methods to determine $k_z$ .....	11
7.1	General .....	11
7.2	Static experimental method with a reference cantilever .....	11
7.2.1	Set-up .....	11
7.2.2	Determining $k_z$ .....	12
7.2.3	Uncertainty .....	14
7.3	Static experimental method using a nanoindenter .....	15
7.3.1	General .....	15
7.3.2	Determining $k_z$ for a tipped or tipless cantilever .....	15
7.3.3	Uncertainty .....	16
7.4	Measurement methods .....	18
7.4.1	Static deflection calibration .....	18
8	Dynamic experimental methods to determine $k_z$ .....	18
8.1	General .....	18
8.2	Dynamic experimental method using thermal vibrations using AFM .....	18
8.2.1	Determining $k_z$ .....	18
8.2.2	Uncertainty .....	20
Annex A (informative)	Inter-laboratory and intra-laboratory comparison of AFM cantilevers .....	21
Bibliography .....		24
