## Corrosion of metals and alloys - Determination of the critical crevice temperature (CCT) for stainless steels under potentiostatic control

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1 <b>Scope</b> .....		1
2 <b>Normative references</b> .....		1
3 <b>Terms and definitions</b> .....		1
4 <b>Principle</b> .....		2
5 <b>Equipment</b> .....		2
6 <b>Procedure</b> .....		3
6.1 <b>Preparation of reference electrodes</b> .....		3
6.2 <b>Preparation of specimen</b> .....		3
6.3 <b>Preparation of solution</b> .....		4
6.4 <b>Setting up the test</b> .....		4
6.5 <b>Ending test</b> .....		5
7 <b>Assessment of results</b> .....		5
8 <b>Test report</b> .....		5
<b>Annex A (informative) Examples of how the connections of the electrode can be made</b> .....		7
<b>Annex B (normative) Schematic representation of different crevice formers used for CCT-measurements</b> .....		8
<b>Annex C (normative) Calibration of specimen temperature vs. solution temperature if a specimen holder is used</b> .....		11
<b>Annex D (informative) Potential difference of selected reference electrodes at 25 °C with respect to the standard hydrogen electrode (SHE)</b> .....		12
<b>Bibliography</b> .....		13
