Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 4
3.1 Electrochemical and potentiometric cells, combination electrodes and electrodes 4
3.1.1 Terms and definitions regarding electrochemical cells 4
3.1.2 Terms and definitions regarding reference electrodes 6
3.1.3 Terms and definitions regarding measuring electrodes 7
3.1.4 Terms and definitions regarding temperature compensation 8
3.2 Potentials and potential differences (= voltages) in galvanic cells 8
3.3 Measuring and operational characteristics of combination electrodes 10
3.4 Electrode errors 11
3.5 Design of combination electrodes 12
3.6 Electrode data 12
3.7 pH meter and pH transmitter 14
3.8 Reference buffer solutions 14

Annex A (informative) Temperature dependence of Nernst voltage for pH combination electrodes ..16
