# ISO 19635:2016-03 (E)

## Fine ceramics (advanced ceramics, advanced technical ceramics) - Test method for antialgal activity of semiconducting photocatalytic materials

## Contents

Page

Foreword ..... iv

Introduction ..... v

1 Scope ..... 1

2 Normative references ..... 1

3 Termsanddefinitions ..... 1

4 Algae used in the test ..... 2

5 Preparation for the test ..... 2
5.1 Conditions for handling of algae ..... 2
5.2 Chemicals, materials, and apparatus ..... 2
5.3 Sterilization and filtration methods ..... 3
5.3.1 Hot-air sterilization ..... 3
5.3.2 Hot-steam sterilization ..... 3
5.3.3 Flaming ..... 4
5.3.4 Sterilization with alcohol ..... 4
5.3.5 Sterilization through filtration ..... 4
5.4 Culture media ..... 4
5.4.1 General ..... 4
5.4.2 C culture medium ..... 5
5.4.3 Slant medium ..... 5
5.4.4 Washing solution ..... 5

6 Cultivation of algae ..... 5
6.1 Transplantation and cultivation of algae ..... 5
6.2 Preparation of test solution ..... 6

7 Photoirradiation method ..... 6
7.1 Measurement of UV light intensity and preparation of the test piece installation location 6 7.2 Photoirradiation conditions ..... 6

8 Test ..... 7
8.1 Preparation of test piece ..... 7
8.2 Cleaning and installation of test pieces ..... 7
8.2.1 Cleaning of test pieces ..... 7
8.2.2 Installation of test pieces ..... 7
8.3 Inoculation of test solution ..... 8
8.4 Washing of test solution immediately after inoculation of test solution ..... 9
8.5 Washing of test solution after test ..... 9
8.6 Measurement according to the three-point absorbance method ..... 9
8.7 Storage in the dark of test piece on which the test solution has been inoculated ..... 10

9 Test results ..... 10
9.1 General ..... 10
9.2 Calculation of antialgal activity on the basis of absorption spectrum method for photocatalytic antialgal materials ..... 11

**10 Recording of test results ..... 11**

**Bibliography ..... 12**
