## Nanotechnologies - Compilation and description of sample preparation and dosing methods for engineered and manufactured nanomaterials

---

| <b>Contents</b>    |   | <b>Page</b> |
|--------------------|---|-------------|
| Foreword .....     |   | v           |
| Introduction ..... |   | vi          |
| 1                  | Scope .....   | 1           |
| 2                  | Normative references .....  | 1           |
| 3                  | Terms and definitions .....   | 1           |
| 4                  | Abbreviated terms .....   | 3           |
| 5                  | Background .....  | 3           |
| 5.1                | Discussion of the importance of sample preparation and dosing .....                                       | 3           |
| 5.2                | Discussion of specific issues when testing the toxicology of manufactured nanomaterials                   |             |
| 5.2.1              | Physical properties .....   | 4           |
| 5.2.2              | Sample preparation .....  | 4           |
| 5.2.3              | Administration of doses .....   | 5           |
| 5.3                | Discussion of relevant dosing for toxicological screening .....   | 5           |
| 5.5                | Review of other relevant international activities and documents .....                                     | 5           |
| 6                  | Physico-chemical properties .....   | 6           |
| 6.1                | Particle size, shape, size distribution and degree of agglomeration .....                                 | 6           |
| 6.2                | Chemical description -- Composition and identification .....  | 6           |
| 6.3                | Specific surface area .....   | 6           |
| 6.4                | Surface chemistry .....   | 6           |
| 6.5                | Isoelectric point, zeta potential and Hamaker constant .....  | 7           |
| 6.6                | Influence of water chemistry on nanomaterial properties and dispersion behavior .....                     | 8           |
| 6.7                | Preparation of liquid dispersions .....   | 8           |
| 6.8                | Crystal structure .....   | 8           |
| 6.9                | Surface energy or interfacial tension .....   | 8           |
| 6.10               | Solubility .....  | 8           |
| 7                  | Considerations for preparing samples of nanomaterials in exposure media in ecotoxicity studies .....      | 9           |
| 7.1                | General .....   | 9           |
| 7.1.1              | Introduction to existing knowledge .....  | 9           |
| 7.1.2              | Environmental behaviour .....   | 9           |
| 7.1.3              | Degradation and transformation .....  | 9           |
| 7.1.4              | Bioaccumulation .....   | 9           |
| 7.2                | Test method applicability and dosimetry .....   | 10          |
| 7.2.1              | Environmental distribution .....  | 10          |
| 7.2.2              | Degradation and transformation .....  | 10          |
| 7.2.3              | Bioaccumulation .....   | 11          |
| 8                  | Methods for preparing nanomaterials for toxicological studies in mammals that ensure correct dosing ..... | 11          |
| 8.1                | Issues to consider for stock dispersion preparation .....   | 11          |
| 8.2                | Importance of monitoring stability of test dispersions during experiments .....                           | 11          |
| 8.3                | Special considerations for physiological salines used in mammalian studies .....                          | 12          |
| 8.4                | Routes of delivery and behaviour of nanomaterial dispersions in mammalian studies .....                   | 12          |

|       |   |    |
|-------|---|----|
| 8.4.1 | Respiratory tract exposures .....   | 12 |
| 8.4.2 | Oral exposure .....   | 12 |
| 8.4.3 | Dermal exposures .....  | 13 |
| 8.4.4 | Injection routes .....  | 13 |
| 9     | Methods for preparing samples of nanomaterials for use in cell cultures ..... | 13 |
| 9.1   | Cell cultures and dispersion of nanomaterials in culture media .....          | 13 |
| 9.1.1 | General .....   | 13 |
| 9.1.2 | Considerations for nanomaterial dispersion in the dosing solution .....       | 13 |
| 9.1.3 | Consideration of relevant exposure scenarios .....                            | 14 |
| 9.2   | Cell cultures .....   | 14 |
|       | Bibliography .....  | 16 |
