## Gas analysis - Comparison methods for the determination of the composition of gas mixtures based on one- and two-point calibration

---

| <b>Contents</b>   |   | <b>Page</b> |
|---|---|-------------|
| Foreword .....  |   | iv          |
| Introduction .....  |   | v           |
| 1   | Scope .....   | 1           |
| 2   | Normative references .....  | 1           |
| 3   | Terms and definitions .....   | 1           |
| 4   | Symbols .....   | 2           |
| 5   | Abbreviated terms .....   | 2           |
| 6   | Principle .....   | 3           |
| 6.1   | General requirements .....  | 3           |
| 6.2   | Calibration methods .....   | 4           |
| 7   | Main procedure .....  | 4           |
| 7.1   | Pre-requisites .....  | 4           |
| 7.2   | Sequence of operations (overview) .....                               | 4           |
| 7.3   | Calibration and measurement designs .....                             | 5           |
| 7.3.1   | General .....   | 5           |
| 7.3.2   | Single-point exact-match calibration (SPEM) .....                     | 6           |
| 7.3.3   | Single-point through origin calibration (SPO) .....                   | 6           |
| 7.3.4   | Two-point calibration with a blank (TPB) .....                        | 7           |
| 7.3.5   | Two-point calibration with bracketing (TPC) .....                     | 7           |
| 7.3.6   | Multipoint calibration (MPC) .....                                    | 8           |
| 8   | Performance evaluation of the measuring system .....                  | 8           |
| 8.1   | General .....   | 8           |
| 8.2   | Sources of performance evaluation data and alternative approach ..... | 11          |
| 8.2.1   | Performance evaluation other than in-house .....                      | 11          |
| 8.2.2   | Alternative for performance evaluation .....                          | 11          |
| 9   | Quality assurance measures .....                                      | 11          |
| 9.1   | Validation of the assumptions made .....                              | 11          |
| 9.2   | Drift/stability control of the measuring system .....                 | 11          |
| 10  | Report of results .....   | 12          |
| 10.1  | Calibration gas certificates .....                                    | 12          |
| 10.2  | Report of analysis .....  | 12          |
| Annex A (normative) System-stability check required when using exact-match and bracketing designs ..... |   | 13          |
| Annex B (normative) Statistics and sensitivity coefficients used in Clause 7 .....                      |   | 15          |
| Annex C (normative) Alternative approach to assessing the nonlinearity contribution .....               |   | 17          |
| Annex D (informative) Worked-out example .....  |   | 19          |

|  |           |
|--|-----------|
| <b>Annex E (informative) Using the designs without preceding system performance evaluation .....</b> | <b>22</b> |
| <b>Bibliography .....</b>  | <b>24</b> |
