DIN EN ISO 14713-3:2017-08 (E)

Zinc coatings - Guidelines and recommendations for the protection against corrosion of iron and steel in structures - Part 3: Sherardizing (ISO 14713-3:2017)

Contents

Page

European foreword ... **3**

Foreword ... **4**

Introduction ... **5**

1 Scope ... **6**

2 Normative references ... **6**

3 Terms and definitions ... **6**

4 Design for sherardizing ... **7**
4.1 General ... 7
4.2 Surface preparation ... 7
4.3 Design considerations ... 8
4.4 Clearances of threaded components ... 8

5 Storage and transport ... **9**
5.1 General ... 9
5.2 Recommendations for storage and transport ... 9

6 Effects of article condition on quality of sherardizing ... **9**
6.1 Composition ... 9
6.2 Surface condition ... 9
6.3 Influence of steel surface roughness on the sherardized coating thickness ... 10
6.4 Internal stresses in the base material ... 10
6.4.1 General ... 10
6.4.2 Distortion cracking ... 10
6.4.3 Hydrogen embrittlement ... 11
6.5 Large objects and thick steels ... 11

7 Effect of sherardizing process on the article ... **11**
7.1 Processing circumstances ... 11
7.2 Coating properties influenced by the sherardizing process ... 11
7.2.1 Sherardizing practice ... 11
7.2.2 Surface properties of the finished article ... 11

8 After-treatments ... **12**

Bibliography ... **13**
