

DIN EN ISO 16371-2:2018-02 (E)

Non-destructive testing - Industrial computed radiography with storage phosphor imaging plates - Part 2: General principles for testing of metallic materials using X-rays and gamma rays (ISO 16371-2:2017)

Contents	Page
European foreword	3
Foreword	4
1 Scope	5
2 Normative references	5
3 Terms and definitions	6
4 Symbols and abbreviated terms	9
5 Personnel qualification	10
6 Classification of computed radiographic techniques and compensation principles	10
6.1 Classification	10
6.2 Compensation principles, CP I and CP II	10
7 General	11
7.1 Protection against ionizing radiation	11
7.2 Surface preparation and stage of manufacture	11
7.3 Identification of radiographs	11
7.4 Marking	11
7.5 Overlap of phosphor imaging plates	11
7.6 Types and positions of image quality indicators and IQI values	12
8 Recommended techniques for making computed radiographs	13
8.1 Test arrangements	13
8.2 Choice of X-ray tube voltage and radiation source	13
8.2.1 X-ray equipment	13
8.2.2 Other radiation sources	14
8.3 CR systems and screens	15
8.3.1 Minimum normalized signal-to-noise ratio	15
8.3.2 Metal screens and shielding	15
8.4 Maximum unsharpness and basic spatial resolution for CR system selection	17
8.4.1 System selection	18
8.4.2 Compensation principle II	18
8.5 Alignment of beam	19
8.6 Reduction of scattered radiation	19
8.6.1 Metal filters and collimators	19
8.6.2 Interception of back scattered radiation	19
8.7 Source to object distance	19
8.7.1 General requirements	19
8.7.2 Testing of planar objects and curved objects with flexible IPs	19
8.7.3 Testing of curved objects with IPs in cassettes	20
8.7.4 Exceptions for panoramic projection exposures with the source in the centre of the pipe	20
8.8 Maximum area for a single exposure	22
8.9 Erasure of imaging plates	23
8.10 Data processing	23
8.10.1 Image processing	23
8.10.2 Monitor, viewing conditions and storage of digital radiographs	23
9 Test report	23
Annex A (normative) Determination of basic spatial resolution, SR_b^{detector}	25
Annex B (normative) Determination of normalized SNR_N from SNR_{measured}	30
Annex C (normative) Determination of minimum grey value	32
Bibliography	35
