

# ISO 37:2017-11 (E)

## Rubber, vulcanized or thermoplastic - Determination of tensile stress-strain properties

---

| <b>Contents</b> |  | <b>Page</b> |
|-----------------|--|-------------|
| Foreword .....  |  | iv          |
| 1               | Scope .....                                  | 1           |
| 2               | Normative references .....                   | 1           |
| 3               | Terms and definitions .....                  | 1           |
| 4               | Principle .....                              | 4           |
| 5               | General .....                                | 4           |
| 6               | Test pieces .....                            | 4           |
| 6.1             | General .....                                | 4           |
| 6.2             | Dumb-bells .....                             | 5           |
| 6.3             | Rings .....                                  | 5           |
| 7               | Apparatus .....                              | 6           |
| 7.1             | Dies and cutters .....                       | 6           |
| 7.2             | Thickness gauge .....                        | 6           |
| 7.3             | Cone gauge .....                             | 6           |
| 7.4             | Tensile-testing machine .....                | 7           |
| 7.5             | Test rig for ring test pieces .....          | 8           |
| 8               | Number of test pieces .....                  | 9           |
| 9               | Preparation of test pieces .....             | 9           |
| 9.1             | Dumb-bells .....                             | 9           |
| 9.2             | Rings .....                                  | 9           |
| 10              | Conditioning of sample and test pieces ..... | 9           |
| 10.1            | Time between vulcanization and testing ..... | 9           |
| 10.2            | Protection of samples and test pieces .....  | 10          |
| 10.3            | Conditioning of samples .....                | 10          |
| 10.4            | Conditioning of test pieces .....            | 10          |
| 11              | Marking of dumb-bell test pieces .....       | 10          |
| 12              | Measurement of test pieces .....             | 10          |
| 12.1            | Dumb-bells .....                             | 10          |
| 12.2            | Rings .....                                  | 11          |
| 12.3            | Comparison of groups of test pieces .....    | 11          |
| 13              | Procedure .....                              | 11          |
| 13.1            | Dumb-bell test pieces .....                  | 11          |
| 13.2            | Ring test pieces .....                       | 11          |
| 14              | Temperature of test .....                    | 12          |
| 15              | Calculation of results .....                 | 12          |
| 15.1            | Dumb-bells .....                             | 12          |

|             |   |           |
