

DIN EN ISO 11699-2:2018-12 (E)

Non-destructive testing - Industrial radiographic films - Part 2: Control of film processing by means of reference values (ISO 11699-2:2018)

Contents

	Page
European foreword	3
Foreword	4
Introduction	5
1 Scope	6
2 Normative references	6
3 Terms and definitions	6
4 Manufacturing of pre-exposed film strips for control of the processing system	7
4.1 Size	7
4.2 Selection of film strip type	7
4.3 Examples of production of pre-exposed film strips	7
4.4 Measurement fields and determination of reference values	8
4.5 Pre-exposed film strip certificate	9
4.6 Storage of pre-exposed film strips	10
5 User verification of compliance with a classified film system	10
5.1 Film systems of same manufacturer of films and processing chemistry	10
5.2 Film systems of different manufacturer's films and processing chemistry (mixed systems)	10
5.3 Processing conditions	10
5.3.1 Automatic processing	10
5.3.2 Manual processing	11
5.4 Processing of pre-exposed film strips	11
5.5 Evaluation of the pre-exposed film strips	11
5.5.1 Calibration of densitometer	11
5.5.2 Parameters for processing system evaluation	11
5.5.3 Control of fixing and washing	11
6 Interpretation of results	12
6.1 General	12
6.2 Limits for D_0	12
6.3 Speed index (S_x)	12
6.4 Contrast index (C_x)	12
7 Checking intervals	12
8 Test report	12
9 Compliance with film system classification	13
Annex A (normative) Method for processing control	14
