

DIN EN 14214:2019-05 (E)

Liquid petroleum products - Fatty acid methyl esters (FAME) for use in diesel engines and heating applications - Requirements and test methods (includes Amendment :2019)

Contents		Page
European foreword		3
Introduction		5
1	Scope	5
2	Normative references	5
3	Sampling	8
4	Pump marking	8
5	Requirements and test methods	8
5.1	Dyes and markers	8
5.2	Additives	8
5.2.1	General	8
5.2.2	Oxidation stability enhancing additives	9
5.2.3	Non-FAME components	9
5.3	Generally applicable requirements and related test methods	9
Table 1 --	Generally applicable requirements and test methods	10
5.4	Climate dependent requirements and related test methods	11
5.4.1	General	11
5.4.2	FAME being used at 100 % as fuel for diesel engines and heating applications	12
Table 2 --	Climate-related requirements and test methods for FAME fuel	12
5.4.3	FAME being used as blend component in diesel fuel	12
Table 3 --	Climate-related requirements and test methods for FAME blend component	13
Table 3b --	Monoglyceride content choices	13
5.5	Precision and dispute	13
Annex A (normative)	Details of interlaboratory test programme	15
Table A.1 --	Precision data from interlaboratory test programme	16
Annex B (normative)	Correction factor for calculation of density of FAME	18
Annex C (informative)	Background information for national climate grades selection	19
C.1	General	19
Table C.1 --	Maximum recommended EN 590 diesel saturated monoglyceride contents	20
C.2	Calculation model for saturated monoglycerides in pure FAME	20
C.3	Calculation of EN 590 diesel fuel saturated monoglyceride content	20
