

# DIN EN 14214:2019-05 (E)

Liquid petroleum products - Fatty acid methyl esters (FAME) for use in diesel engines and heating applications - Requirements and test methods (includes Amendment :2019)

## Contents

	Page
European foreword .....	3
Introduction .....	5
1    Scope .....	5
2    Normative references .....	5
3    Sampling .....	8
4    Pump marking .....	8
5    Requirements and test methods .....	8
5.1    Dyes and markers .....	8
5.2    Additives .....	8
5.2.1    General .....	8
5.2.2    Oxidation stability enhancing additives .....	9
5.2.3    Non-FAME components .....	9
5.3    Generally applicable requirements and related test methods .....	9
Table 1 -- Generally applicable requirements and test methods .....	10
5.4    Climate dependent requirements and related test methods .....	11
5.4.1    General .....	11
5.4.2    FAME being used at 100 % as fuel for diesel engines and heating applications .....	12
Table 2 -- Climate-related requirements and test methods for FAME fuel .....	12
5.4.3    FAME being used as blend component in diesel fuel .....	12
Table 3 -- Climate-related requirements and test methods for FAME blend component .....	13
Table 3b -- Monoglyceride content choices .....	13
5.5    Precision and dispute .....	13
Annex A (normative) Details of interlaboratory test programme .....	15
Table A.1 -- Precision data from interlaboratory test programme .....	16
Annex B (normative) Correction factor for calculation of density of FAME .....	18
Annex C (informative) Background information for national climate grades selection .....	19
C.1    General .....	19
Table C.1 -- Maximum recommended EN 590 diesel saturated monoglyceride contents .....	20
C.2    Calculation model for saturated monoglycerides in pure FAME .....	20
C.3    Calculation of EN 590 diesel fuel saturated monoglyceride content .....	20
