ISO 13605:2018 (E)

Solid mineral fuels — Major and minor elements in coal ash and coke ash — Wavelength dispersive x-ray fluorescence spectrometric method

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Reagents

5.1 General
5.2 Flux and heavy absorber

6 Apparatus

7 Sample

7.1 Coal and coke ash prepared in the laboratory
7.2 Coal and coke ash

8 Procedure

8.1 Number of determinations
8.2 Test portion
8.3 Check test
8.4 Calibration
8.5 Preparation of the fused discs
8.5.1 General
8.5.2 Disc storage
8.5.3 Fused disc quality
8.6 XRF measurement
8.6.1 Instrumental conditions
8.6.2 Monitor measurements

9 Calculation

9.1 General
9.2 Correction of instrumental drift
9.3 Correction for dead time losses
9.4 Matrix corrections

10 Reporting results

11 Precision

12 Test report

Annex A (normative) Acceptance of analytical results for laboratory method

A.1 Acceptance of analytical values

Annex B (informative) Reagents suitable for the preparation of synthetic calibration standards

Annex C (normative) Standard deviation of glass disc preparation

C.1 General
C.2 Procedure

Annex D (informative) Calculation of phosphorus using P2O5

D.1 General
D.2 Phosphorus in ash
D.3 Phosphorus in coal
