

ISO 248-2:2019 (E)

Rubber, raw — Determination of volatile-matter content — Part 2: Thermogravimetric methods using an automatic analyser with an infrared drying unit

Contents

	Foreword
1	Scope
2	Normative references
3	Terms and definitions
4	Principle
5	Reagents
6	Apparatus
6.1	Automatic analyser
7	Sampling and preparation of test portion
8	Procedure
8.1	General
8.2	Determination of endpoints for method A and method B
8.3	Method A (pre-defined drying time method)
8.4	Method B (in which drying ends when the mass loss rate has decreased to a pre-defined level)
8.5	Calculation of volatile-matter content
9	Precision
10	Test report
Annex A	(informative) Examples of test conditions
A.1	General
A.2	Examples of conditions
Annex B	(informative) Precision data
B.1	General
B.2	Details of the ITP
B.3	Precision results
