ISO 22517:2019 (E)

Leather — Chemical tests — Determination of pesticide residues content

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Safety precautions

6 Reagents

7 Apparatus

8 Procedure

- 8.1 Sample
- 8.2 Extraction
- 8.3 Purification
- 8.4 Calibration solutions
- 8.4.1 Preparation of calibration solution mixture
- 8.4.2 Preparation of calibration mixture for recovery rate
- 8.5 Preparation of blank sample
- 8.6 Analysis by GC-MS
- 8.7 Check of the analytical system

9 Evaluation of results

- 9.1 Calculation of results
- 9.2 Reliability of the method

10 Test report

Annex A (normative) 24 kinds of pesticide compounds

Annex B (informative) GC-MS chromatographic conditions and parameters

Annex C (informative) Retention time, quantitative and qualitative ions and ion abundance ratios

Annex D (informative) Start time and dwell time of each group of detecting ions

Annex E (informative) Chromatogram and selected ion of the 24 pesticides standard obtained by GC-MS

Annex F (informative) Recovery range of pesticides in leather (n = 6)

Annex G (informative) Precision
