ISO 10753:2019 (E)

Coal preparation plant — Assessment of the liability to breakdown in water of materials associated with coal seams

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Reagent

6 Apparatus

7 Sampling and preparation of test sample

8 Procedure

- 8.1 Determination of initial moisture content
- 8.2 Preparation of test portion
- 8.3 Determination of residual moisture content
- 8.4 Agitation of test portion
- 8.5 Sieving of suspension
- 8.6 Treatment of fines
- 8.7 Preparation of water and apparatus for sedimentation
- 8.8 Adjustment of concentration of suspension
- 8.9 Determination of settling time
- 8.10 Determination of particles below 10 µm nominal size (slimes) by sedimentation
- 8.11 Number of tests

9 Expression of results

- 9.1 Material passing through the 500 µm test sieve
- 9.2 Particles below 10 µm nominal size (slimes)
- 9.2.1 No further dilution
- 9.2.2 Further dilution
- 9.3 Breakdown ratio

10 Precision

- 10.1 Repeatability limit
- 10.2 Reproducibility limit

11 Test method

Annex A (informative) Calculation of settling time

Annex B (informative) Example of a suitable format for the test report
