ISO 21859:2019 (E)

Fine ceramics (advanced ceramics, advanced technical ceramics) — Test method for plasma resistance of ceramic components in semiconductor manufacturing equipment

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Principle of measurement

5 Test environment

6 Apparatus

7 Test pieces

7.1 General consideration
7.2 Surface conditions

8 Procedure

8.1 Measurement of surface roughness before a plasma resistance test
8.2 Masking
8.3 Plasma resistance test
8.3.1 Setting of test pieces
8.3.2 Test conditions
8.4 Measurement of erosion depth
8.5 Measurement of surface roughness after the plasma resistance test

9 Calculation

9.1 Calculation of mean erosion depth
9.2 Calculation of surface roughness

10 Test report

Page count: 4
