ISO 10086-1:2019 (E)

Coal — Methods for evaluating flocculants for use in coal preparation — Part 1: Basic parameters

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Apparatus

6 Materials

6.1 Slurry
6.2 Water

7 Sampling

8 Preparation of flocculant solutions

8.1 Powder flocculants
8.2 7.2 Liquid flocculants

9 Procedure

9.1 Preparation of test sample
9.2 Determination of settling rate
9.2.1 Free settling rate
9.2.2 Full settling curve
9.3 Determination of sediment height and supernatant clarity

10 Calculation of results

10.1 Flocculant dosage rate

11 Recording of results

12 Repeatability

13 Test report

Annex A (informative) Worked example

Annex B (informative) Data recording sheets

B.1 Free-settling rate
B.2 Full settling curve
