ISO 5893:2019 (E)

Rubber and plastics test equipment — Tensile, flexural and compression types (constant rate of traverse) — Specification

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Designation of machine class

5 Design features

- 5.1 Size and construction
- 5.2 Axial alignment of the machine
- 5.3 Test piece grips
- 5.4 Drive characteristics
- 5.5 Jigs for use in compression, shear and flexure testing

6 Types of force-measuring system

7 Steady-state machine accuracy

8 Dynamic machine accuracy

9 Measurement of elongation (deflection)

10 Rate of displacement of driven grip

11 Machine stiffness

12 Stability

13 Certificate of verification
