

# DIN EN 17243:2020-05 (E)

## Cathodic protection of internal surfaces of metallic tanks, structures, equipment, and piping containing seawater

---

<b>Contents</b>		<b>Page</b>
European foreword .....		3
Introduction .....		4
1	Scope .....	5
2	Normative references .....	5
3	Terms and definitions .....	5
4	Competence of personnel .....	7
5	General considerations .....	7
6	Cathodic protection criteria .....	9
7	Design .....	11
8	Galvanic anodes system .....	18
9	Impressed current systems .....	26
10	Commissioning, operation and maintenance .....	30
Annex A (informative) Environmental checklist .....		36
Annex B (informative) Guidance on design values for internal cathodic protection for seawater containing equipment .....		38
B.1	Typical design cathodic current densities .....	38
B.2	Coating breakdown factor of protective paint systems .....	39
Annex C (informative) Calculation of potential distribution inside a pipe or tube .....		40
C.1	Potential distribution inside a pipe (ignoring anode resistance) .....	40
C.2	Potential distribution inside a pipe (with anode resistance) .....	40
C.3	Potential distribution inside a tube .....	41
Annex D (informative) Design of galvanic anode systems .....		42
D.1	Anode resistance formulae .....	42
D.2	Calculation of the anode resistance at the end of life .....	43
D.3	Electrolyte resistivity .....	44
D.4	Galvanic anode current output .....	46
D.5	Anode life .....	47
D.6	Minimum net weight requirement .....	47
Annex E (informative) Typical electrochemical characteristics of impressed current anodes. 48		
Annex F (informative) Design of impressed current systems .....		49
F.1	Internal cathodic protection of tanks .....	49

<b>F.2</b>	<b>Evaluation of the maximum length of a rod anode projecting into the water flow for mechanical integrity .....</b>	<b>50</b>
	<b>Bibliography .....</b>	<b>52</b>
