Foreword	6
[A1] Foreword to Amendment [A1]	7
Introduction	8
1 Scope	9
2 Normative references	9
3 Terms and definitions	9
4 Stages in the planning of an interlaboratory study for the determination of the precision of a test method	12
4.1 General	12
4.2 Preparing a draft method of test	13
4.3 Planning a pilot study with at least two laboratories	13
4.4 Planning the ILS	13
4.5 Executing the ILS	14
5 Statistical treatment of ILS results	15
5.1 General recommendation	15
5.2 Pre-screen using GESD technique	15
5.3 Transformation of data and outlier tests	16
5.3.1 General	16
5.3.2 Outlier identification after pre-screening	19
5.3.3 Uniformity of repeatability	19
5.3.4 Uniformity of reproducibility	19
5.4 Rejection of complete data (from all laboratories) for a sample	19
5.5 Estimating missing or rejected values	20
5.5.1 One of the two repeat values missing or rejected	20
5.5.2 Both repeat values missing or rejected	20
5.6 Rejection test for outlying laboratories	20
5.7 Confirmation of selected transformation	21
5.7.1 General	21
5.7.2 Identification of excessively influential sample(s)	21
6 Analysis of variance, calculation and expression of precision estimates	22
6.1 General	22
6.2 Analysis of variance	22
6.2.1 Forming the sums of squares for the laboratories × samples interaction sum of squares	22
6.2.2 Forming the sum of squares for the exact analysis of variance	23
6.2.3 Degrees of freedom	23
6.2.4 Mean squares and analysis of variance	23
6.3 Expectation of mean squares and calculation of precision estimates	23
6.3.1 Expectation of mean squares with no estimated values	23
6.3.2 Expectation of mean squares with estimated values	24
6.3.3 Calculation of precision estimates	25

6.4	Expression of precision estimates of a method of test.....	26
6.5	Specification of scope for the test method.....	27
6.6	[A₁] Reporting limits instruction for the test method [A₁]	28
7	<i>R/r</i> ratio	28
Annex A (normative) Determination of number of samples required		29
Annex B (informative) Derivation of formula for estimating the number of laboratories and samples required to meet minimum 30 degrees of freedom		31
Annex C (normative) Notation and tests		33
Annex D (normative) Illustration of procedures using ILS results for Bromine Number and statistical tables		38
Annex E (normative) Types of dependence and corresponding transformations		57
Annex F (normative) Weighted linear regression analysis		63
Annex G (normative) Rules for rounding		70
Annex H (normative) GESD technique to simultaneously identify multiple outliers in a data set ...		72
Annex I (informative) Glossary		80
Bibliography		83
