

# DIN EN 17035:2021-12 (E)

## Surface active agents - Bio-based surfactants - Requirements and test methods

---

| <b>Contents</b> |   | <b>Page</b> |
|-----------------|---|-------------|
|                 | European foreword .....                             | 3           |
|                 | Introduction .....                                  | 4           |
| 1               | Scope .....   | 6           |
| 2               | Normative references .....                          | 6           |
| 3               | Terms and definitions .....                         | 7           |
| 4               | Generalities on surfactants .....                   | 7           |
| 5               | Performance of surfactants .....                    | 8           |
| 5.1             | Generalities related to performance .....           | 8           |
| 5.2             | Technical performance properties .....              | 8           |
| 5.2.1           | General .....                                       | 8           |
| 5.2.2           | Chemical composition .....                          | 8           |
| 5.2.3           | Solubility .....                                    | 9           |
| 5.2.4           | Surface and interfacial tension .....               | 9           |
| 5.2.5           | Foaming power .....                                 | 9           |
| 5.2.6           | Wetting performance .....                           | 9           |
| 5.2.7           | Emulsion power .....                                | 10          |
| 6               | Health, safety and environmental requirements ..... | 10          |
| 7               | Bio-based content .....                             | 10          |
| 7.1             | Generalities .....                                  | 10          |
| 7.2             | Surfactant classification .....                     | 11          |
| 7.3             | Analytical approach .....                           | 12          |
| 8               | Sustainability .....                                | 12          |
| 9               | End of life .....                                   | 12          |
| 10              | Declaration and product labelling .....             | 13          |
|                 | Annex A (informative) Sub-sampling procedure .....  | 14          |
|                 | Bibliography .....                                  | 15          |
