ISO/TR 21624:2020-04 (E)

Nanotechnologies - Considerations for in vitro studies of airborne nano-objects and their aggregates and agglomerates (NOAA)

Contents

Page

Foreword ... **iv**

Introduction ... **v**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **1**

4 Abbreviated terms ... **2**

5 Considerations for in vitro systems for assessing inhalation exposure to NOAA ... **3**
5.1 Background ... 3
5.2 Modes of exposure ... 4
5.2.1 General ... 4
5.2.2 Considerations for ALI exposure systems ... 5
5.3 Considerations for characterizing NOAA tested in vitro studies of airborne nanomaterials ... 9
5.4 Choice of cell systems ... 10
5.4.1 General ... 10
5.4.2 Mono-culture systems ... 10
5.4.3 Co-cultures/three-dimensional systems ... 12

6 Choice of appropriate dose and dose metrics ... **15**
6.1 General ... 15
6.2 In silico methods to assess dose/dose metrics and deposition ... 16

7 Summary ... **16**

Annex A (informative) **Application of adverse outcome pathways (AOPs) to design in vitro-based approaches** ... **17**

Bibliography ... **18**
