## Corrosion of metals and alloys - Classification of low corrosivity of indoor atmospheres - Part 2: Determination of corrosion attack in indoor atmospheres

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1 <b>Scope</b> .....		1
2 <b>Normative references</b> .....		1
3 <b>Terms and definitions</b> .....		1
4 <b>Principle</b> .....		1
5 <b>Methods</b> .....		1
<b>Annex A (informative) Determination of corrosion rate by mass change measurement</b> .....		4
<b>Annex B (informative) Determination of corrosion rate by electrolytic cathodic reduction</b> .....		8
<b>Annex C (informative) Determination of corrosion rate by resistance measurements</b> .....		10
<b>Annex D (informative) Determination of corrosion rate by quartz crystal micro-balance methodology</b> .....		12
<b>Bibliography</b> .....		15
