

Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
4	Part I: Proposed method for direct determination of bridging behaviour
4.1	Introduction to the method
4.2	Principle
4.3	Test equipment
4.4	Sampling and sample preparation
4.5	Procedure
4.6	Calculation
4.7	Precision and bias
4.8	Test reporting
5	Part II: Implementing the measuring principle
5.1	Review of apparatus construction
5.2	Other equipment
5.3	Measurement performance
6	Part III: Experience and results from bridging tests
6.1	General
6.2	Performance characteristics of bridging test method
6.2.1	General
6.2.2	Sensitivity analysis on testing accuracy
6.2.3	Reproducibility (interlaboratory test results)
6.2.4	Repeatability
6.3	Characterization of selected biomass fuels
6.4	Influencing factors on bridging
6.5	Outlook
