| 4.1 General .....                                                                                                              | 11          |
| 4.2 Calibration .....                                                                                                          | 11          |
| 4.3 Verification .....                                                                                                         | 11          |
| <b>5 Frequency range</b> .....                                                                                                 | <b>12</b>   |
| 5.1 Tapping machine as the impact source .....                                                                                 | 12          |
| 5.2 Rubber ball as the impact source .....                                                                                     | 12          |
| <b>6 General</b> .....                                                                                                         | <b>12</b>   |
| <b>7 Default procedure for sound pressure level measurement</b> .....                                                          | <b>13</b>   |
| 7.1 General .....                                                                                                              | 13          |
| 7.2 Generation of sound field .....                                                                                            | 13          |
| 7.2.1 General .....                                                                                                            | 13          |
| 7.2.2 Impact source positions for the tapping machine as impact source .....                                                   | 13          |
| 7.2.3 Impact source positions for the rubber ball as impact source .....                                                       | 14          |
| 7.3 Fixed microphone positions for the tapping machine or rubber ball as impact source .....                                   | 14          |
| 7.3.1 General .....                                                                                                            | 14          |
| 7.3.2 Number of measurements .....                                                                                             | 14          |
| 7.3.3 Tapping machine operated at more than one position .....                                                                 | 14          |
| 7.3.4 Rubber ball operated at more than one position .....                                                                     | 15          |
| 7.4 Mechanized continuously moving microphone for the tapping machine as impact source .....                                   | 15          |
| 7.4.1 General .....                                                                                                            | 15          |
| 7.4.2 Number of measurements .....                                                                                             | 16          |
| 7.4.3 Tapping machine operated at more than one position .....                                                                 | 16          |
| 7.5 Manually scanned microphone for the tapping machine as impact source .....                                                 | 16          |
| 7.5.1 General .....                                                                                                            | 16          |
| 7.5.2 Number of measurements .....                                                                                             | 16          |
| 7.5.3 Tapping machine operated at more than one position .....                                                                 | 16          |
| 7.5.4 Circle .....                                                                                                             | 16          |
| 7.5.5 Helix .....                                                                                                              | 16          |
| 7.5.6 Cylindrical-type .....                                                                                                   | 17          |
| 7.5.7 Three semicircles .....                                                                                                  | 17          |
| 7.6 Minimum distances for microphone positions .....                                                                           | 18          |
| 7.7 Averaging times for the tapping machine as impact source .....                                                             | 18          |
| 7.7.1 Fixed microphone positions .....                                                                                         | 18          |
| 7.7.2 Mechanized continuously moving microphone .....                                                                          | 19          |
| 7.7.3 Manually scanned microphone .....                                                                                        | 19          |
| 7.8 Calculation of energy-average sound pressure levels .....                                                                  | 19          |
| 7.8.1 Fixed microphone positions for the tapping machine as impact source .....                                                | 19          |
| 7.8.2 Mechanized continuously moving microphone and manually scanned microphone for the tapping machine as impact source ..... | 19          |
| 7.8.3 Fixed microphone positions for the rubber ball as impact source .....                                                    | 20          |

|                     |                                                                                                              |           |
