ISO 22744-2:2020 (E)

Textiles and textile products — Determination of organotin compounds — Part 2: Direct method using liquid chromatography

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Reagents

6 Apparatus and materials

7 Preparation of the test sample

8 Procedure

- 8.1 General
- 8.2 Preparation of the extraction solvent (250 mg/l of tropolone in methanol/ethanol mixture)
- 8.3 Preparation of standard solution
- 8.3.1 General
- 8.3.2 Internal standards — Stock solution (1 000 mg/l of organotin cation)
- 8.3.3 Internal standards — Working solution (2 mg/l of organotin cation)
- 8.3.4 Standards — Stock solution (1 000 mg/l of organotin cation)
- 8.3.5 Standards — Working solution (10 mg/l of organotin cation)
- 8.4 Sample extraction
- 8.5 Sample analysis

9 Expression of results

- 9.1 Calibration curve
- 9.2 Calculation
- 9.3 Reliability of the method

10 Test report

Annex A (informative) Example of chromatographic condition

- A.1 Preliminary remark
- A.2 LC conditions
- A.3 MS/MS conditions

Annex B (informative) Example of calibration preparation

Annex C (informative) Reliability of the method
